

Home Shield® 500ml Trigger Spray

Home Shield®, from Fossil Shield®, is a strong adhesive liquid suspension, forming a residual protective chalky coating that dries out red mite.

- 500 ml trigger spray
- Unique technology
- Suitable for hen housing with 1 to 10 hens
- Ready to use formulation
- Residual long lasting effect
- Dries out red mite physically
- Works 12 X faster compared to conventional diatomaceous earth products
- Protects up to 2 X longer compared to conventional diatomaceous earth products
- Also adheres to oily surfaces.

Delivered in 1 x 500 ml bottle (screw cap) and 1 x trigger spray and pipe
Note: Prior to first use, unscrew cap, insert and screw trigger spray

How does it work:

Residual protective layer

Home Shield® grips around surfaces, cracks and crevices where red mite like to live, providing a unique residual protective coarse layer on targeted surfaces.

Silica based

Home Shield® is a unique silica-based product, providing a residual protective coarse layer on targeted surfaces.

Drying out physical properties

As the red mite crawl through, Home Shield® scratches the outer waxy shell, drying them out, controlling red mite populations in a physical way.

Instructions for use:

- Before application, remove birds, eggs, all feed and eating and drinking utensils, all bedding and clean the housing thoroughly.
- Remove bottle cap, thread trigger spray and pipe into bottle, screw in and shake content thoroughly.
- Shake again before use.
- Spray directly onto all surfaces, taking particular care to spray in hard-to-reach areas – cracks and crevices.
- After application, thoroughly ventilate treated areas before animals are returned.
- Do not handle treated materials until dry, and air thoroughly before use.

Safety:

- Follow directions and comply with safety data sheet.
- Exercise caution when using biocides. Always read the label and product information before use.
- Keep product out of reach of children
- When applying product or performing any other tasks involving product contact, wear all-purpose safety gloves and P3 protective mask.
- Only use product for intended purpose
- Do not spray persons or animals with product
- It is imperative to ensure proper ventilation before, during and after application of product.
