

BioVX 1kg

Concentrated Virucidal Disinfectant

- Effective against bacteria, moulds, fungi and all viruses
- Bio-degradable
- Effective against biofilms
- Superior dilution rate giving increased economy

Chicken Vet BioVX is broad spectrum and effective against bacteria, fungi, yeasts and all known classes of virus. Because of superior dilution rates it is highly cost-effective, works equally well in both hard and soft water and is unaffected by temperature fluctuation.

General Properties

A white powder consisting of stabilised blend of peroxygen compounds, surfactants, organic acids and an inorganic buffer system.

Instruction for Use

1. Apply at the recommended dilution rate via a power-washer set at low pressure (100psi) with a wide angled jet, thoroughly wetting all surfaces but avoiding excess run off.

General orders application: 1:100*

Foot and mouth disease: 1:1200*

Swine vesicular disease: 1:135*

Disease of Poultry Orders: 1:285*

*DEFRA Approved

2. **Disinfection:**

For general purpose disinfection apply to surface using a back pack sprayer at a dilution of 1:200, thoroughly wetting all surfaces. This will require 250-300ml of solution per m² to achieve thorough wetting.

3. **Water Sanitation:**

During terminal disinfection, drain header tank and clean, fill tank and dose with Chicken Vet BioVX to achieve 1:200 dilution. Stand in system for 1 hour, drain and flush with clean water. In the presence of animals, dose the header tank daily with a 1:1000 dilution.

4. **Fogging:**

Using a mechanical fogger apply a 1:200 dilution as a fine mist. This procedure can be safely carried out in the presence of livestock at times of disease challenge.

Pack Size

1 kg tub
