### Poorly poultry?

From advice on health and common diseases to breeding and keeping chickens, we've got it covered.

Use our online Symptom Checker to help you identify what illness your chicken may have and how to treat it.

## DIGESTIVE HEALTH

### Biostop 100ml

A natural herbal remedy containing a blend of essential oils to help maintain gut health and support the bird during digestive upset and diarrhoea. Useful following antibiotic therapy. For sick chickens seek veterinary advice.

Use in drinking water at 2.5 - 5 ml for 3 to 5 days.

### Digesti-Health 2kg

This supplement will maintain optimal digestive health and overall well-being. The powder contains ingredients that will improve egg and egg shell quality and hatchability. It will absorb harmful fungal toxins and normalise gut flora reinforcing the hen's natural defences. Great as a daily supplement to keep your hens in top condition.

Use in feed daily, 1 scoop per 2 birds.

### Apple Cider Vinegar 1L

A natural product that lowers the pH of drinking water for birds, making the water hostile for pathogenic bacteria to thrive. Favourable bacteria prefer an acidic environment which means Apple Cider Vinegar is beneficial for optimising favourable bacteria in the chicken's gut.

Use at a rate of 10ml per litre of drinking water for 7 days.

### Beryl's Friendly Bacteria - 12 hen sachets

Administer directly to the bird or give in feed. It contains over 200 species of friendly bacteria that will aid in forming a barrier in the hen's gut against harmful pathogens such as salmonella and E. coli.

It is especially useful after illness and stress and when antibiotics have been given to the bird to re-establish the friendly bacteria in the gut and aid a speedier recovery.

## MITES AND LICE

### Androlis Predator Mite

Predator mites are a natural way to control red mite infestations within the poultry coop. These Androlis® mites are the most effective predator mites available, being a safe and effective way to reduce the red mite burden on your birds. Predator mites are not harmful to humans or chickens. Available in a range of volumes.

Visit website for instructions of use.

### DE Powder 1kg/400g Puffer

Natural Diatomaceous Earth Powder is for use in poultry housing with the purpose of drying litter to reduce ammonia, moulds and fungi and to deter the colonisation of mites and other crawling insects.

Safe to use directly onto your hens. Apply to the coop by spreading the powder in cracks, crevices and nest box areas where mites hide to deter them.

### Dergall 100ml

Dergall is an innovative treatment for tackling red mite infestations. It is effective for the treatment of red mites, northern fowl mite and scaly leg mite in chickens. Dergall is a concentrated product which needs diluting before use. Apply to the coop and safe to apply on the birds too.

Use, then repeat in 5-7 days to destroy newly hatched mites.

## WORMING

### Faeces Sampling Kit

An easy to use kit that will test your chicken's faeces for worm eggs and coccidiosis infection. The price of the kit includes the cost of the laboratory fee. Can be used to check whether your current wormer is being effective or use prior to routine worming to establish a need. The test will also confirm whether or not your chickens are suffering from coccidiosis.

### Flubendazole 60g

This wormer is suited to worming chickens, geese and turkeys for the control of gapeworm, roundworm, caecal worm, hairworm and gizzard worm. Actively controlling adult worms, along with their larvae and eggs.

Flubendazole is given over 7 days in the feed to eradicate all these stages of the worm's lifecycle.

## STARTER KITS

### Starter Kit

Whether you are starting out with chickens or an experienced keeper this pack will help to get you started. The products will keep the coop clean and the hens healthy. Products are all recommended by our team of poultry vets and are cheaper than buying products individually.

The pack includes:

- Poultry Disinfectant 1L RTU
- Poultry Multivitamins 500ml
- Digesti-Health 2kg
- DE Powder 1kg
- Anti-Peck 250ml

### Mite Traps and Sticky Trap Pads

These traps provide an easy way of checking if there are mites present in your chicken house, as well as the added bonus of monitoring and trapping these persistent parasites. They can be used in conjunction with other methods of mite control.

## FLY CONTROL

### Red Top Fly Trap

The Red Top Fly Trap can capture up to 20,000 flies and last up to 12 weeks. Just hang the trap away from the poultry house and the flies will be drawn to the attractant. This is a very popular product which really does work, even our vets use them at home!

## HYGIENE

### Poultry Shield Concentrate 1 litre

Poultry Shield Concentrate is a cleaner and disinfectant to use on your coop and equipment. It is non-caustic and safe to use. Although this is a disinfectant, poultry owners have reported that it has been extremely effective against infestation of red mite.

Use at a rate of 60ml per 6 litres of clean water.

### Interkokask RTU 500ml

This is a broad spectrum disinfectant working against coccidial oocysts, roundworm eggs, bacteria, fungi and viruses. This product is DEFRA approved therefore suitable for notifiable poultry diseases. Interkokask has been found to destroy red mites and red mite eggs.

Once diluted according to the instructions, spray onto housing and equipment.

Bioshield is a disinfectant and it is effective against viruses, bacteria, mycoplasma and fungi. It is active in the presence of organic matter and can be used effectively in both hard and soft water. The special foaming properties give rapid action, and a longer lasting contact killing time than normal conventional disinfectants. Bioshield can also be used to disinfect all other livestock housing. We advise wearing protective clothing when using this product.

### Dri Bed 5kg

This is an absorbent and deodorising powder, enhanced with disinfectant, to provide all round hygiene within the poultry housing.

Dri Bed absorbs moisture in the litter and as it does so the disinfectant comes into action, therefore reducing ammonia and bad smells alongside providing a reduction in pathogens.

Apply 50g/m<sup>2</sup> to animal bedding and also spread around drinkers.

### Poultry Disinfectant 1L RTU

A powerful biocidal disinfectant, cleaner, sanitiser and odour neutraliser. Poultry Disinfectant is in a ready to use spray for use on poultry housing and associated equipment.

Spray evenly on interior areas, perches, nest boxes and all equipment, paying particular attention to joints and crevices. Repeat every two weeks or as necessary.

### Intersoft N 1kg

A thorough hand cleaner which is naturally pH neutral to protect your hands even when frequently used.

Use like liquid soap after handling your birds or cleaning out the coop. It also has a fresh smell.

### BioVX 1kg

This disinfectant is effective against bacteria, moulds, fungi and all viruses. It is safe to use and environmentally friendly, as it degrades to harmless components. It is highly cost-effective due to its dilution rates and works equally well in hard and soft water, and it is not affected by temperature.

See website for usage instructions.

### Stalosan F 15kg

Stalosan F® is a dry powder disinfectant and desiccator, presented in a plastic sack. It reduces bacteria, fungi and moulds, optimising sanitary conditions. It offers a high level of acid minerals which decompose harmful pathogens and creates a hostile environment for coccidiosis. Stalosan reduces moisture and ammonia levels and has been found to deter parasites including ticks.

Stalosan F® is used at the rate of 50g/m<sup>2</sup>.

## NUTRITION

### Poultry Multivitamins 500ml

Poultry Multivitamins contains minerals, vitamins and amino acids, combined with natural essential oils and antioxidants. It is great as a general booster to maintain health; at times of illness, stress, transportation and during extremes of weather throughout the year.

Use in drinking water at 25ml per 5 litres for 3-10 days.

### Zolcal-D

Zolcal-D is perfect to assist the ageing layer (over 50 weeks) and rehomed ex-commercial layers with an adequate supply of supplementary dietary calcium and vitamin D to help keep optimal health, alongside improving shell quality.

Visit website for instructions of use.

### Mixed Poultry Grit 1.5kg

This product contains oystershell and flint. Soluble oystershell contains calcium and provides the bird with a supply which is utilised to produce a hard well-formed shell. The flint is insoluble and is used by the bird to grind feed particles down in its gizzard to aid digestion. Suitable for young poultry and adult birds. Provide at all times in a separate container to the food so your birds can select what they require, when they require it.

## STRESS RELIEVERS

### Anti-Peck 250ml

This Anti-Peck Spray has been carefully formulated to reduce the incidence of feather pulling and pecking. It is a clear, bitter tasting spray.

Use for 7 days, spray onto the feathers of the group of birds with the pecking issue, not just the bird being pecked, until the situation is resolved.
